Tell us your dream and we help you to realize it, our glazing solutions will improve your living and working environment. With our own developed and manufactured products we do more than 45,000 projects per year, which fit for private houses, multifamily houses and commercial buildings. Maybe you need glazing for your balcony, terrace, winter garden, living room, shop or office? Then we are ready to customize a modern and long-lasting solution according to your specific needs, and we have done so since 1985. You will enjoy so many benefits such as weather protection, noise reduction, protection from pollution, decreased energy consumption and increased value of your property. But most important, you extend your feel-good time! You find us in most countries in Europe but we are not limited to that, we are happy to serve you wherever you are.

Utopia Music is a Swiss/Swedish-based technology company that leverages big data in order to enhance the global music industry through increased revenues, reduced costs, accelerated payment cycles and improved insights, while creating an ecosystem where music & tech foster creativity & joy. A revolution in the music industry and a game changer, where the power of the music is once again returned to the copyright holders.

We aim to upgrade the infrastructure of the music industry, by creating a state-of-the-art platform. Our mission is to collect, organize and utilizes music data, to enable a transparent, fair and data driven industry, with a simple goal: one play one pay. So whenever and wherever a song is played, the correct copyright holder gets paid in a timely manner and receives a fair portion (nearing 100%) of the money paid out.

Pepicon's goal is to digitize the fundraising and investment process in unlisted companies. Companies can improve their odds of getting funded by giving them a tool which will guide them to master their company investment pitch, source and invite more investors effortlessly, and raise funds or exit with speed. Moreover, investors can keep their portfolio companies transaction ready, while streamlining their dealflow for faster and more accurate investment selection, vetting and decision making.
